IRYNA ILLIUKHINA

FRONT-END DEVELOPER

Experienced Front-end Developer with nearly 4 years of experience in building dynamic web applications using Magento, Vue, and React. Skilled in working with international teams and in Agile environments, I am seeking to apply my expertise to exciting projects in Germany and across Europe.

WORK EXPERIENCE

Jan. 2021 - July 2024

Front-end Developer at Vaimo, remotely

Worked on Magento projects with international teams (3 to 10 members) in Agile environments (Scrum, Kanban) for clients across the Middle East, USA, Canada, and Europe. I collaborated with back-end developers and, at times, served as the sole front-end developer on the project.

Key Responsibilities:

- Implemented functionality according to design specifications, enhancing layouts and templates using XML, PHTML, HTML, CSS, Less, and Sass.
- Configured admin panels, including CMS content, roles, and access management.
- Worked on headless front-end solutions using Vue and React technologies.
- Managed direct communication with clients, setting deadlines and project workflows.
- Created and customized email templates.
- Handled data layers and analytics scripts.
- Utilized Jira for time tracking and Bitbucket for code management.

Examples of released projects:

- Hexaplan.fi: Developed email templates, implemented checkout logic (JS), integrated API calls, supported Magento migration (v2.4.5), and managed Google Analytics and Klevu integrations.
- Rapala.eu: Led design implementation, ensured accessibility, and developed the Vue-based top navigation.
- Baltikelektro.lv: launching a new website for The Würth Group member

EDUCATION
